# When Summer Bites Back: Pediatric Foot Lesions, Warts, and Water Hazards

07/22/2026 7:00 PM Eastern

Live Virtual Webinar

This CME program on summer-related pediatric foot conditions equips clinicians with a focused, practical approach to evaluating and managing skin lesions, warts, and water-associated foot injuries in children. Participants will review common seasonal presentations, including traumatic lacerations, puncture wounds, plantar verrucae, and skin infections and lesions related to pools, lakes, and coastal environments or daycare, with emphasis on distinguishing benign conditions from those at risk for complications. Learners will also examine evidence-based strategies for prevention, early recognition, and appropriate treatment, integrating wound assessment, infection risk stratification, and patient-family education. By combining seasonal epidemiology with pediatric-specific management principles, this program empowers clinicians to reduce morbidity, prevent missed diagnoses, and deliver timely, child-centered care during the summer months.

## Learning Objectives:

1. Identify common infectious and dermatologic conditions affecting the pediatric foot and ankle and differentiate their clinical presentations.
2. Describe the microbial, environmental, and behavioral risk factors associated with pediatric foot infections and dermatologic conditions during summer activities and exposures.
3. Apply evidence-based treatment strategies, including debridement, antimicrobial therapies, and preventive interventions, for the management of common pediatric foot infections and skin disorders.
4. Assess potential etiologic factors contributing to recurrent pediatric foot lesions, including biofilm formation, footwear-related factors, and hygiene practices.
5. Develop patient- and family-centered education strategies to promote prevention, reduce recurrence, and improve community awareness of pediatric foot health conditions.

**Intended Audience:** Podiatrists

**Fees:** \$ 0.00

**Refund Policy:** N/A

**In-House CME is accredited by the Council on Podiatric Medical Education as a provider of continuing education in podiatric medicine. In-House CME has accredited this activity for a maximum of 1.0 continuing education contact hour.**

No commercial interest provided financial support for this continuing education activity.

## Panelists

---

### **Mark Solomon, DPM**

Dr. Mark Solomon is a partner of The Pediatric Orthopedic Center in Cedar Knolls, New Jersey. He is the director and founder of the Pediatric Foot and Ankle Fellowship, which is the first DPM/MD/DO fellowship with a pediatric orthopedics group. Dr. Solomon is managing and founding partner of POC Creative Works, LLC which is a think tank of pediatric orthopedic surgeons with the combined goal of innovation, research and development of products that help children rehabilitate and recover from orthopedic illnesses and injuries.

**Disclosures:** Dr. Solomon is a consultant for Stryker, Orthofix, and Ossio

### **Aamir Ahmed, DPM**

Dr. Ahmed is a fellowship-trained, **double board-certified** foot and ankle surgeon with advanced expertise in reconstructive and minimally invasive surgical techniques. He earned his bachelor's and master's degrees in biomedical engineering from the New Jersey Institute of Technology, where he graduated cum laude and competed as an NCAA Division I Track and Field athlete, before completing his medical degree at the New York College of Podiatric Medicine. He went on to complete a three-year surgical residency at St. Mary's General Hospital in Passaic, NJ, gaining extensive experience in adult foot and ankle reconstruction, trauma, arthroscopy, diabetic limb salvage, and wound care. Following residency, he completed a pediatric foot and ankle fellowship at The Pediatric Orthopedic Center in Cedar Knolls, NJ, where he trained under Dr. Mark Solomon and Dr. Mark Rieger. There, he gained specialized experience treating congenital deformities, growth plate injuries, and sports and dance-related conditions in children.
